ASSOCIATION DENTAIRE CANADIENNE

DENTAL APTITUDE TEST SCORE SCALE NOVEMBER 2016

The Dental Aptitude Test (DAT) is scored using the DAT standard score scale. The standard score scale is an ability-referenced scale that ranges from 1 to 30. The scores have the same meaning regardless of the ability distribution of the particular cohort examined on your test date. This means the scores from one DAT can be compared to those of other DAT events.

To assist you in interpreting the standard scores you received, on the back of this sheet are seven cumulative percentile tables that are specific to this particular DAT. Use these tables to compare your standard scores to those of the other persons who took this particular test.

See the sample row below for an example of how to read the tables.

Sample row (not from this test)

Score	# Cand.	%	Cum %
17	116	9.24%	26%
Your score	# of candidates with same score	% of candidates with same score	26% of candidates had score the same or less

The Science Average is the weighted average of your standard scores on the Biology and General Chemistry tests (not the arithmetic average). The Academic Average is the average of your standard scores on the Reading Comprehension, Biology, and General Chemistry tests.

ÉCHELLE DE NOTES DU TEST D'APTITUDES AUX ÉTUDES DENTAIRES – NOVEMBRE 2016

On note les épreuves du Test d'aptitudes aux études dentaires (TAED) suivant l'échelle de notes zêta. Il s'agit d'une échelle servant à interpréter les aptitudes et graduée de 1 à 30. Les notes ont toujours la même signification, quelle que soit la distribution des aptitudes dans le groupe mis à l'épreuve au moment où vous avez subi l'examen. Autrement dit, les notes d'un TAED peuvent être comparées à celles d'autres TAED.

Pour vous aider à interpréter les notes zêta que vous avez reçues, vous trouverez au verso six tables de centiles cumulatifs s'appliquant spécifiquement à ce TAED particulier. Utilisez-les pour comparer vos notes à celles des autres candidats qui ont subi ce même test.

Prenez cet exemple pour savoir comment interpréter les tables.

Exemple (non de cet examen)

Note	Candidats	%	Cumulatif
17	116	9,24 %	26 %
Votre note	Nombre de candidats avec les mêmes résultats	% des candidats avec les mêmes résultats	% des candidats avec des résultats égaux ou moindres

La moyenne en sciences est la moyenne pondérée de vos notes zêta pour les examens de biologie et de chimie générale (non pas la moyenne arithmétique). La moyenne scolaire est la moyenne de vos notes zêta pour les examens de compréhension écrite, de biologie et de chimie générale.
