Tier levels are boundaries set from 1-999, that determine which incentive a particular critical position can receive at a given point. The tier level (1-7) are determined upon an algorithm that calculates a raw RPM score. The tier levels that receive incentives are Tier Levels 1-6, subsequently factored as most critical to least critical. Tier level 7 does not receive an incentive per current incentive policy. Also, the boundaries are based upon a % of vacancies that NGB, with DA approval, wants to incentivize. Tier levels are used for enlisted accession incentives.
