*Data are from Medicare Cost Reports, Health Care Financing Administration.

†The total amount per resident is the amount a hospital would receive if all third-party insurers paid for the direct costs of graduate medical education on the basis of Medicare's calculation of its payment.

‡The number of full-time–equivalent residents is the number claimed by a hospital on its Medicare Cost Report.

§The total Medicare payment is what Medicare pays a hospital for its full-time–equivalent residents.

¶The Medicare payment per resident is an average of two separate payments: one for primary care residents and one for all other residents.
