Know Where You Are Needed

Look for your name and follow the column down. Those are all the places that need you, sorted by priority and wait time.

Need Dr. Sal to the Lab right away? Just page him again. We escalate that alert and put it on the top.

Just make your stops according to the schedule. No more people running around the office looking for you, or you looking at Post-Its or flags trying to figure out where to go next.

Dr.Sal	Dr.John
Current Location	Current Location
@Lab [2] ⚠ 04:20	@Operatory [1] 04:30
Next Stops	Next Stops
BackOffice [1] 05:15	ExamRoom [1] 05:00

# Receive Pages Anywhere You Go

Use your existing computers to run our software. No additional hardware to purchase or wires to run. We support multiple platforms, Mac, Windows, even Pebble!

Now you can receive pages anywhere. Check in and out from the watch and interact with our software remotely. It's all at your fingertips!

Identify Gridlocks and Increase Profit

Find out the wait time of your patients, which location is the bottleneck, or which person takes the longest to respond.

Change the way you do patient scheduling or shuffle personnel. Now you can make adjustments based on measurable performance metrics to improve your practice efficiency and increase profit.

Why DoctorMeow?
Because when you page them, they get a notification right "Meow".

On average, our clients "Meow" 90+ times a day. That equates to roughly 6 hours of combined staff time saved using our paging system. Let us help you save too!
