

No Time to Waste!

Beginning Jan. 1, 2015 you must attest for the full year on an ONC 2014 Certified EHR

StreamlineMD invites you to join our growing community of Pain Practices

In the most recent update from CMS, it was confirmed that providers will not be permitted to attest for Meaningful Use in 2015 on a 2011 Certified EHR.

To assist with this challenge, StreamlineMD has created an incentive program to transition pain practices to our 2014 Certified EHR.

StreamlineMD EHR v14.0
CHPL Product ID: 140070R00

Three Reasons Your EHR Transition Will Succeed

Three Powerful Modules, Perfectly Integrated, Tailored to Fit You

StreamlineEHR™ **StreamlinePM+™** **StreamlineBilling™**

1. Complete

StreamlineMD offers integrated solutions for every aspect of your revenue cycle management. Choose the solutions you need or choose all three to streamline your workflow.

2. Pain Management Specific

StreamlineEHR is pain specialty and pain practice specific. Our existing pain management templates and our implementation approach are designed specifically for the needs of the specialty.

3. Successful

StreamlineMD has three times the industry average success rate in successful transitions due to our incremental, hand-holding approach.

2014 EDITION

StreamlineEHR

Advancing Pain Management Practice Success

Complete Solutions for Interventional Pain Practices

- ✓ StreamlineMD provides unique pain practice billing services, practice management software and pain specific EHR.
- ✓ Your benefit is a maximum amount of reimbursement in a minimal amount of your time!

Pain Management Specific

We understand interventional pain practice requirements. The proof is in our extensive pain management clinical content. The following is a small sampling of our pain procedure templates:

Epidural Steroid Injection
Facet Injection
Medial Branch Block
Median Nerve Block
Pain Pump Placement

Pain Pump Refill
Radiofrequency Thermocoagulation
Spinal Cord Stimulator
Transforaminal Epidural Steroid Injection
Trigger Point Injection

Patient Visit Customization

Streamline MD allows you to organize your charts by visit type to capture and easily record the purpose for these types of visits:

- ✓ Workers Compensation Visit
- ✓ Motor Vehicle Accident Visit
- ✓ Initial Pain Evaluation
- ✓ Procedure Follow-up Visit
- ✓ Medication Management Follow-up Visit
- ✓ IME
- ✓ EMG report

This also allows you to have separate documentation for multiple treatments for one patient. For example, you can have a worker's compensation folder and a motor vehicle injury folder within a patient's chart.
