

## Instructions on how to review the SMP/ SPB Master List

### Table content:

The number “1” in the chart indicates the program is suitable for health professional type(s) it is listed under.

|             |                                                                                                                                                                                                          |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| MED         | This program is appropriate for pre-medical applicants. Also students who complete the program can successfully matriculate into medical school.                                                         |
| DENT        | This program is appropriate for pre-dental applicants. Also students who complete the program can successfully matriculate into medical school.                                                          |
| PHARM       | This program is appropriate for pre-pharmacy applicants. Also students who complete the program can successfully matriculate into pharmacy school.                                                       |
| OPT         | This program is appropriate for pre-optometry applicants. Also students who complete the program can successfully matriculate into optometry school.                                                     |
| VET         | This program is appropriate for pre-veterinary applicants. Also students who complete the program can successfully matriculate into veterinary school.                                                   |
| PA          | This program is appropriate for pre-physician assistant applicants. Also students who complete the program can successfully matriculate into physician assistant school.                                 |
| POD         | This program is appropriate for pre-podiatry applicants. Also students who complete the program can successfully matriculate into podiatry school.                                                       |
| NUR         | This program is appropriate for pre-nursing applicants. Also students who complete the program can successfully matriculate into nursing school.                                                         |
| PT          | This program is appropriate for pre-physical therapy applicants. Also students who complete the program can successfully matriculate into physical therapy school.                                       |
| Majority HP | This program is appropriate for a majority of health professional schools listed above and not listed. Student completing program have been successfully matriculated into a health professional school. |
| Allied HLTH | This program is appropriate for majority of allied health professions. Health professions <u>distinct from</u> medicine, dentistry, and nursing.                                                         |

|                   |                                                                                                                                                                                                                                                             |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                   |                                                                                                                                                                                                                                                             |
| Post Bacc         | This is a one year post undergraduate degree program. Students completing the program can earn a certificate - if offered.                                                                                                                                  |
| MA/MS             | This is an accelerated one year or traditional two year masters of arts or masters of science graduate program. Students completing the program will earn a graduate degree.                                                                                |
| Su                | This is a summer program                                                                                                                                                                                                                                    |
| State             | State location of program                                                                                                                                                                                                                                   |
| Academic Enhancer | Program is intended for students whom have earned a science degree and or satisfied a majority of all academic science courses required for admission into a health profession school but need to strengthen their academic record by continuing education. |
| Career Changer    | Program is intended for students with few or no academic science background. Program is designed to help complete the pre-requisites required for admissions into a health professional school.                                                             |
| Disadvantage      | Program is intended for students with disadvantage status: social economically, minority, and or 1 <sup>st</sup> generation college graduate.                                                                                                               |

\*Schools highlighted on the SMP/SPB Master List are also referenced in the Specialized Master Program Sample Summary List. The summary list provides a summary description & unique highlights about the program.

*Both list (SMP/SPB Master list and SMP Sample Summary List) serves as a resource guide and should not be used as a final resource. All prospective applicants are encouraged to visit the programs direct website for current information & instructions. Additional resource link; the AAMC Post baccalaureate Premedical Program Database, <http://services.aamc.org/postbac/>*

*Questions regarding this posting can be directed to [hyha@uci.edu](mailto:hyha@uci.edu). Program specific questions should be directed to admissions of prospective SMP or SPB program.*

| <b>Unique Notes</b>                                 | <p>The curriculum in the M.A. in Medical Sciences (MAMS) Program is closely aligned with the first year medical curriculum at Boston University School of Medicine. Students select from current course offering in consultation with their Faculty Advisor to best reflect their interests and background.</p> <p>The program requires enrollment in four semesters and can be completed in 12 months by utilizing the two summer semesters. The total cost of tuition is the same for both the 12 month and two year path.</p> <p>Of the graduates who apply to a medical school, approximately 70% are admitted into medical schools in the U.S., from pool of Boston MSMS grads, usually 25-30 students are accepted into Boston University School of Medicine each year.</p> <p>Also accept Canadian and International student applicants.</p> |
| <b>Cost</b>                                         | \$44,226                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Drexel University College of Medicine

**Description:** Offers a variety of programs that help better position students and professionals for careers in the health sciences. These courses prepare students for entry into medical, dental, optometry, chiropractic, podiatric and veterinary medical schools.

All are one year certificate programs. However, each program offers another year of study for those wishing to pursue additional coursework that will lead to a master's degree. Students can decide whether one or two years of additional coursework will best aid their particular situation in gaining acceptance into a health professional school. The optional second year benefits students by allowing them to further demonstrate their academic abilities while in the application process.

All applicants must have taken the MCAT or GRE

### Eastern Virginia Medical School M.S in Biomedical Sciences- Medical Master's

**Description:** The program provides an opportunity for highly motivated students to improve their academic credentials by demonstrating their academic abilities in a rigorous medical school environment. For this reason, it is particularly suitable to help students to make themselves more competitive applicants to medical programs.

| <b>Standardized Test scores (if applicable)</b> | MCAT 28 – competitive<br><br><i>May consider GRE scores</i> for admission to The SMP, however if you are accepted, will assume that you will be taking the MCAT prior to, or immediately after arriving for orientation. Competitive GRE scores would be an average 650 in each section, and analytical score of 5.0 or higher.                                                                                                                                                                                                                                |
| <b>Unique Notes</b>                             | One year masters program that begins mid August to early June.<br><br>The SMP students take six of their classes and examinations with Georgetown's first-year medical students.<br><br>Graduates matriculating to medical school; historically, 50-60% of SMP students have gained admission to medical school during the year they are enrolled in the program. Approximately 85% of all SMP students have eventually been accepted to medical school.<br><br>Strongly encourage applicants to take a biochemistry course prior to matriculating in the SMP. |
| <b>Cost</b>                                     | Tuition \$43,608                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Deadline</b>                                 | Early application is highly recommended due to competitive pool & rolling admissions. Application cycle is opens December 1 <sup>st</sup> . Application must be submitted by May 15.                                                                                                                                                                                                                                                                                                                                                                           |

## Georgetown University- Georgetown Experimental Medical Studies Program (GEMS)

**Description:** The GEMS Program is designed to provide an opportunity for disadvantaged students who show promise of the ability to complete a medical education to demonstrate this ability by passing selected courses taught to first-year medical students at Georgetown.

## Loyola University Chicago M.A in Medical Sciences

**Description:** The one year intensive Master of Arts (M.A.) in Medical Sciences degree program focuses on the development of intellectual skills and mastery of scientific concepts needed to succeed in medical school. Program is designed to help applicants whom are already good candidates for admission to medical school, but need to strengthen their academic preparation.

## Midwestern University College of Health Sciences: M.S in Biomedical Sciences in Downers Grove

**Description:** The Masters of Science in Biomedical Science (MSMBS) degree is a 2 year program is designed to prepare and graduate students who have extensive knowledge, technical skills, and expertise to function in a variety of biomedical professions. These include careers in areas such as technicians and supervisors in the biotechnology and pharmaceutical industry, research personnel in biomedical sciences laboratories, employees in governmental and regulatory agencies, and undergraduate teaching. In addition, the curriculum will make the successful student a competitive candidate for admission to post baccalaureate professional schools offering degrees in the health sciences.

## University of Southern California School of Medicine KECK: M.S in Global Medicine

**Description:** The a one-year M.S.in Global Medicine (MSGM) program is offered by the Departments of Preventive Medicine and Educational Affairs of the Keck School of Medicine. The program aims to train medical, dental, and pharmacy students, current physicians and allied health professionals, and those planning to pursue degrees in the allied health professions to analyze and address critical issues in global medicine.
